The practical lessons were the most helpful to me since I learnt how to use Microsoft excel, also the videos he would do and post for us before any class we had were very helpful. The excel sheets	I wish it can be done face to face and be deliberately slow..the lecturer loaded with good content in IT	More practice needed for slow learners.the unit should be given quality time.
The practical exercises were very helpful in understanding how to implement in a real life office environment	If the practical modules could be split further as many functions sometimes can be confusing to learn in one class and make revision before the next class difficult.	N/A
The lecturer explained everything very well and was a bit worried about the online practical classes but they were so helpful	More weeks slotted in for practicals three weeks was a short time	Thanks Mr. Maurice for the job well done
